BADIO, BARBARA P

ART UNIT PAPER NUMBER

1616

DATE MAILED: 09/09/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/607,035

Applicant(s)

AHLEM ET AL.

Examiner

Barbara P. Badio, Ph.D.

Art Unit

1616

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 22-53 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☐ Claim(s) ____ is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☒ Claim(s) 22-53 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☐ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date ____.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: ____.

DETAILED ACTION***Election/Restrictions***

1. The Markush group set forth in the claims contains a plurality of patentably distinct compounds far too numerous to list individually. Due to the numerous variables in the claims, e.g., R¹, R², R³, R⁴, R⁵, R⁶, R⁷, etc. and their widely divergent meanings, a precise listing of inventive groups cannot be made. For this reason, restriction to one of the following Groups is required under 35 U.S.C. 121, wherein a Group is a set of patentably distinct invention of a broad statutory category, i.e. Compounds, Method of Use, etc.:

- I. Claims 22-31 and 51-53, drawn to compounds and compositions, classified in several classes (540, 544, 548, 549 and 552), numerous subclasses.
- II. Claims 32-50, drawn to various methods of use (treating diabetes, inflammation, parasite infection, bacterial infection, etc.), classified in class 514, various subclasses.

2. With the election of any one of Groups I and II, election of a set of compounds is further required. The following groups are exemplary:

Group I. Claims 22-31 and 51-53, drawn to compounds and compositions wherein R⁷ is -CHR¹⁰-, -CHR¹⁰-CHR¹⁰- or -CHR¹⁰-CHR¹⁰-CHR¹⁰-; R⁸ is -CHR¹⁰- or -CHR¹⁰-CHR¹⁰-; R⁹ is -CHR¹⁰- or -CHR¹⁰-CHR¹⁰- and R³ and both R⁴ do not comprise a structure of formula 2.

Art Unit: 1616

Group II. Claims 22 and 23, drawn to compounds and compositions wherein R^7 is $-\text{CHR}^{10}-\text{O}-\text{CHR}^{10}-$, $-\text{CHR}^{10}-\text{S}-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{NR}^{\text{PR}}-\text{CHR}^{10}-$; R^8 is $-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{CHR}^{10}-$; R^9 is $-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{CHR}^{10}-$ and R^3 and both R^4 do not comprise a structure of formula 2.

Group III. Claims 22 and 23, drawn to compounds and compositions wherein R^7 is $-\text{O}-$, $-\text{S}-$ or $-\text{NR}^{\text{PR}}-$; R^8 is $-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{CHR}^{10}-$; R^9 is $-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{CHR}^{10}-$ and R^3 and both R^4 do not comprise a structure of formula 2.

Group IV. Claims 22 and 23, drawn to compounds and compositions wherein R^7 is $-\text{O}-\text{CHR}^{10}-$, $-\text{S}-\text{CHR}^{10}-$ or $-\text{NR}^{\text{PR}}-\text{CHR}^{10}-$; R^8 is $-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{CHR}^{10}-$; R^9 is $-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{CHR}^{10}-$ and R^3 and both R^4 do not comprise a structure of formula 2.

Group V. Claims 22 and 23, drawn to compounds and compositions wherein R^7 is $-\text{CHR}^{10}-$, $-\text{CHR}^{10}-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{CHR}^{10}-\text{CHR}^{10}-$; R^8 is $-\text{O}-$, $-\text{S}-$ or $-\text{NR}^{\text{PR}}-$; R^9 is $-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{CHR}^{10}-$ and R^3 and both R^4 do not comprise a structure of formula 2.

Group VI. Claims 22 and 23, drawn to compounds and compositions wherein R^7 is $-\text{CHR}^{10}-\text{O}-\text{CHR}^{10}-$, $-\text{CHR}^{10}-\text{S}-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{NR}^{\text{PR}}-\text{CHR}^{10}-$; R^8 is $-\text{O}-$, $-\text{S}-$ or $-\text{NR}^{\text{PR}}-$; R^9 is $-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{CHR}^{10}-$ and R^3 and both R^4 do not comprise a structure of formula 2.

Group VII. Claims 22 and 23, drawn to compounds and compositions wherein R^7 is $-\text{O}-$, $-\text{S}-$ or $-\text{NR}^{\text{PR}}-$; R^8 is $-\text{O}-$, $-\text{S}-$ or $-\text{NR}^{\text{PR}}-$; R^9 is $-\text{CHR}^{10}-$ or $-\text{CHR}^{10}-\text{CHR}^{10}-$ and R^3 and both R^4 do not comprise a structure of formula 2.

Art Unit: 1616

Group VIII. Claims 22 and 23, drawn to compounds and compositions wherein R^7 is $-O-CHR^{10}-$, $-S-CHR^{10}-$ or $-NR^{PR}-CHR^{10}-$; R^8 is $-O-$, $-S-$ or $-NR^{PR}-$; R^9 is $-CHR^{10}-$ or $-CHR^{10}-CHR^{10}-$ and R^3 and both R^4 do not comprise a structure of formula 2.

3. With the election of Group II, applicant is further required to elect a specific method of use. For example, (a) Method of treating diabetes or hyperglycemia; (b) Method of treating hyperlipidemia; (c) Method of treating atopic asthma or allergic respiratory disease; (d) Method of treating atopic dermatitis, etc.

Note: With the election of treatment of Inflammation, parasite infection or bacterial infection, applicant is required to identify a specific condition.

4. In accordance with the decisions in *In re Harnisch*, 631 F.2d 716, 206 USPQ 300 (CCPA 1980); and *Ex parte Hozumi*, 3 USPQ2d 1059 (bd. Pat. App. & Int. 1984), restriction of a Markush group is proper where the compounds within the group either (1) do not share a common utility, or (2) do not share a substantial structural feature disclosed as being essential to that utility. In addition, a Markush group may encompass a plurality of independent and distinct inventions where two or more members are so unrelated and diverse that a prior reference anticipating the claim with respect to one of the members would not render the other member(s) obvious under 35 U.S.C. 103.

Art Unit: 1616

5. Applicant is further required under 35 U.S.C. 121 to elect a single disclosed species from under the elected Group for search purposes, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

All compounds falling outside the class(es) and subclass(es) of the selected compound and any other subclass encompassed by the election above will be directed to nonelected subject matter and will be withdrawn from consideration under 35 U.S.C. 121 and 37 C.F.R. 1.142(b). Applicant may reserve the right to file divisional applications on the remaining subject matter. The provisions of 35 U.S.C. 121 apply with regard to double patenting covering divisional applications.

6. The above list in #2 is not exhausted as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, if desired, upon election of a single compound, applicants can review the claims and disclosure to determine the scope of the invention and can **set forth** a group of compounds that are so similar within the same inventive concept and reduction to practice. Markush claims must be provided with support in the

Art Unit: 1616

disclosure for each member of the Markush group. See MPEP 608.01(p).

Applicant should exercise caution in making a selection of a single member for each substituent group on the base molecule to be consistent with the written description.

7. Applicant is reminded that upon cancellation of claims to non-elected invention, the inventors must be amended in compliance with 37 C.F.R. 1.48(b) if one of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. 1.17(i).

8. Rationale Establishing Patentable Distinctiveness Within Each Group

Each Invention Set listed above is directed to compounds which are recognized in the art as being distinct from one another because of their diverse chemical structure, their different chemical properties, modes of action, different effects and reactive conditions (MPEP 806.04, MPEP 808.01). Additionally, the level of skill in the art is not such that one invention would be obvious over either of the other inventions, i.e. they are patentable over each other. Chemical structures that are similar are presumed to function similarly, whereas chemical structures that are not similar are not presumed to function similarly. The presumption even for similar chemical structures though is not irrebuttable, but may be overcome by scientific reasoning or evidence showing that the structure of the prior art would not have been expected to function as the structure of the

Art Unit: 1616

claimed invention. Note that in accordance with the holdings of Application of Papesch, 50 CCPA 1084, 315 F.2d 381, 137 USPQ 43 (CCPA 1963) and In re Lalu, 223 USPQ 1257 (Fed. Cir. 1984), chemical structures are patentably distinct where the structures are either not structurally similar, or the prior art fails to suggest a function of a claimed compound would have been expected from a similar structure.

The above Groups represent general areas wherein the inventions are independent and distinct, each from the other because of the following reasons:

Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (a) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using the product (MPEP 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product as demonstrated throughout the present specification and in claims 32, 37, 40 and 41 which are directed to several different methods of using the products, for example treating diabetes and treating inflammation.

In addition, because of the plethora of classes and/or subclasses in which the claimed compounds fall, a serious burden is imposed on the examiner to perform a complete search of the defined areas. Therefore, because of the

Art Unit: 1616

reasons given above, the restriction set forth is proper and not to restrict would impose a serious burden in the examination of this application.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Telephone Inquiry

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barbara P. Badio, Ph.D. whose telephone number is 571-272-0609. The examiner can normally be reached on M-F from 6:00am-3:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary L. Kunz can be reached on 571-272-0887. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
